

State Technology Approval Reform (STAR)

Project Goals

Create an Efficient and Effective Process

⇒ Create an efficient and effective process that leads to successful project outcomes.

Reduce Project Risk

⇒ Identify opportunities for reducing risk and preventing project cost-overruns.

Build Collaborative Partnerships

⇒ Transform the traditional oversight role by promoting shared responsibility for project success between state entities and oversight managers through collaborative partnerships.

Improve Project Success

⇒ Improve the quality, value, and likelihood of success for IT projects undertaken by the state.

Define Project Data Needs

⇒ Align project data with the Department's overall vision for project data.

Improve Project Approval Integrity

⇒ Develop different approval models to expedite project approvals for low risk, high business value projects.
